

LUKE KNUTSON

Gameplay Systems
Programmer

PROFILE

Gameplay-focused programmer with experience implementing core systems in Unity using C#, with additional exposure to Unreal Engine and C++. Strong foundation in problem-solving and system design, with a focus on writing clean, maintainable code and improving through iterative development.

EDUCATION

FullSail University

2024 - Present

BS in Computer Science and Game Development

WORK EXPERIENCE

School Projects – FullSail University.

2024 - Present

Worked on a variety of game development projects (solo and with teams of people), focusing on building gameplay systems and player interactions. Used Unity (C#) and Unreal Engine (C++) to implement mechanics like movement, combat, and UI, while learning how to structure code and iterate on designs through testing and feedback. Utilized version control and debugging techniques to refine systems and resolve issues throughout development.

General Laborer – The Boldt Company, Northcentral Construction.

2021 – 2024

Gained hands-on experience in construction, developing transferable skills such as problem-solving, communication, and working under pressure. Regularly collaborated with team members to complete tasks efficiently while maintaining safety and quality standards. Learned to manage time effectively and adapt quickly to changing project requirements.

SKILLS

- **Languages:** C#, C++.
- **Game Engines:** Unity, Unreal Engine.
- **Gameplay Systems:** Player movement, combat systems, UI/HUD, input handling.
- **Other Tools:** Git (version control), Visual Studio / Visual Studio Code.
- **Concepts:** Object-oriented programming, debugging, performance optimization, problem solving, code organization, critical thinking.
- **Transferable/Other:** Team collaboration, time management, working under pressure, attention to detail, adaptability, strong work ethic.
